EDUCATION

B.Tech (Hons) Computer Science & AI/ML Specialization

NMIMS University's MPSTME Mumbai

2018 - Ongoing

- Design And Analysis of Algorithms.
- Data Mining
- Object Oriented Programming
- Web Programming (FullStack Development)

GPA

3.66 / 4.0

PROJECTS

Indian Poker strategy testing using simulation

02/2020 - 06/2020

https://github.com/SuperBaniya/poker_simulation

used ML strategies and compared them to basic algorithmic strategies in the game of Indian poker.

- implemented the entire game and simulated more than 1 million games.
- generated the first indian poker dataset on kaggle.

Moodio (a search engine for sound bites)

06/2020 - Ongoing

URL

building an sdk/api for searching a library of sound bytes

- tagging and segmentation of soundbytes
- Building the website and mobile app

Image encryption and data embedding

built a secure way of encoding and compressing images and adding metadata that can be decrypted only using secure keys

CERTIFICATES

CS50's Introduction to Artificial Intelligence with Python

Deep Learning with Keras and Tensorflow in Python

Algorithmic Trading & Quantitative Analysis Using Python

EXPERIENCE

Chairperson

Competitive Coding Club

2020 - Ongoing

Managing a club in college to contribute to coding culture and encourage competitive coding.

- Competing on platforms like CodeChef, Hackerrank, TopCoder, CodeForces.
- Also helped other organizations at the campus introduce Competitive programming

ACHIEVEMENTS

1605 rating at CodeChef

Achieved 3 star rating by solving regularly using Data Structures and Algorithms

SKILLS

Data Structures and Algorithms

FullStack Development

MongoDB

ExpressJS

React

NodeJS

Gatsby

DevOps

GitHub Actions

Netlify

Jest

CI/CD

Linux Scripting

Languages

Python

C/C++

Java

R

PHP

JavaScript
